

Press release

Grants for research into Life after Death.

The Helene Reeder Memorial Fund for Research into Life After Death, (HRF) awarded in December 2006 grants for two research projects as follows:

Mrs Sonia Rinaldi at the International Instrumental Transcommunication Research Institute in Brazil for " An investigation into possible unexpected intelligent disturbance in the visual and audio range" receives EUR 5000. Mr Christian Gaden Jensen et Prof Etzel Cardena for a project "To investigate various aspects of psychic practitioners in Scandinavia" receive EUR 2000.

The HRF was grounded 2004 thanks to a Swedish doctor Helene Reeder. When Helene Reeder transitioned in 2002 she made the Swedish Society for Parapsychological Research her main heir, with a wish that the amount should be used for research into life after death. Consequently the HRF favours research project with clear focus on this topic.

The Helene Reeder Memorial Fund for Research into Life After Death, (HRF) awarded 2005 grants for EVP researchers Paolo Presi and Alexander MacRae, EUR 7000 each, for their respective research project using communications through EVP to investigate the possibility of post-mortem survival.

According to plans the HRF, address c/o edgar.muller@telia.com will also in the beginning of this year publish an announcement for grants for Research into Life after Death, in the range of EUR 500-7000 each. This announcement will be sent to researchers, Journals, Institutions and other addressees involved in the topic.
